Objet : Special Approval

Hi Sal,

In 2001, we participated in a survey for a benchmarking study. According to our understanding, we are unable to publish the results of the study.

As you probably know, Quebec-Hydro is legislated by the Energy Council (the equivalent of the FERC). Thus, we are asked to provide this council with the results of our benchmarking study.

Upon your approval, would it be possible for us to provide the council with the document, including the notion of confidentiality. If so, can you fax us your approval at the following number 514.840.5805. An answer before this Tuesday would be greatly appreciated.

Thank you for your collaboration, and I will be available to answer any question at this number 514.238.1933.
