Régie de l'énergie
DOSSIER: R-3535-2004
DÉPOSÉE EN AUDIENCE
Date: 7 Février 2006
Pièces n°: UMa 2,
DOC. 4

Date of Issue: June 13, 2001

Date Effective: June 15, 2001

Issued by Joan S. Freilich, Executive Vice President and
Chief Financial Officer
4 Irving Place, New York, N.Y. 10003

Issued in compliance with order of the
Public Service Commission dated May 29, 2001
in Case Nos. 00-E-0165 and 94-E-0952.

GENERAL INFORMATION - Continued

III. General Rules, Regulations, Terms and Conditions under Which Electric Service Will Be Supplied,
Applicable to and Made a Part of All Agreements for Electric Service - Continued

3. Installation and Maintenance of Overhead and Underground Facilities - Continued

(E) Underground Facilities

- (1) Facilities to be Installed Underground: The Company shall install underground any distribution line, service line, and appurtenant facilities which are necessary to furnish permanent electric service as follows:
 - (a) To a residential subdivision in which it is planned to build five or more new residential buildings, if the residential subdivision will require no more than 200 trench feet of facilities per dwelling unit planned within the residential subdivision, subject to the exceptions listed in General Rule III - 3 (E) (4) (f);
 - (b) To one or more multiple occupancy buildings if the project will require no more than 200 trench feet of facilities per dwelling unit planned within the project, subject to the exceptions listed in General Rule III - 3 (E) (4) (f);
 - (c) To any building or residential subdivision which a local governmental authority having jurisdiction to do so requires the underground installation of facilities provided that the Company shall not install service lines beyond the property line for non-residential buildings in such instances; and
 - (d) In response to a request for underground facilities by an applicant for service.

In all other circumstances not including the foregoing, the Company will install its facilities overhead.

For the purposes of subdivisions and multiple occupancy buildings under paragraphs (a) and (b), the number of dwelling units is the criterion to be used to determine whether installation is required to be underground. Each lot shown on the approved subdivision map shall, in the case of a single family dwelling, be considered to contain one dwelling unit unless there is sufficient contrary evidence to render it unlikely that each lot will contain a separate dwelling unit (e.g., a foundation is constructed occupying two lots). The measurement of trench footage shall be the shortest distance required to serve the homes within the residential subdivision, consistent with the Company's obligation to provide safe and adequate service.

(General Information - Continued on Leaf No. 35-B)

Date of Issue: January 29, 1999

Date Effective: April 1, 1999

III. General Rules, Regulations, Terms and Conditions under Which Electric Service Will Be Supplied,
Applicable to and Made a Part of All Agreements for Electric Service - Continued

3. Installation and Maintenance of Overhead and Underground Facilities - Continued

(E) Underground Facilities - Continued

(2) Company's Cost Responsibility - Continued

(f) Multiple Occupancy Buildings: Where the Company is required to place facilities underground to serve a residential multiple occupancy building, for any of the reasons listed in General Rule III-3 (E)(1)(b),(c), or (d), the Company shall bear the material and installation cost for up to a total of 100 feet of underground distribution, supply, and service line times the average number of dwelling units per floor. The total number of floors in the multiple occupancy building shall be used to determine the average number of dwelling units per floor.

(3) Customer's Cost Responsibility: If to provide the service requested the Company must install or provide for the installation of facilities in addition to those whose cost the Company must bear under General Rule III-3 (E) (2) "Company's Cost Responsibility", the Company shall impose on the applicant a lump sum charge equal to the material and installation costs of such additional facilities. A residing applicant may, in lieu of a lump sum payment, opt for a surcharge option as outlined in General Rule III - 3 (D) (3). The Company will allow non-residing applicants to perform trenching or other work required to install distribution lines, service lines, or appurtenant facilities within the subdivision in lieu of a surcharge or lump-sum payment provided that the Company and applicant are in agreement on the cost and scope of such work.

(a) With respect to such additional underground facilities that the Company installs to serve a residential subdivision in accordance with General Rule III - 3 (E) (1) (a) or (d), or a residential building or subdivision in response to a local governmental requirement in accordance with General Rule III - 3 (E) (1) (c), such lump sum charge shall equal the difference between the material and installation costs for underground facilities installed less the cost which the Company bears in accordance with General Rule III - 3 (E) (2) (a).
