These materials have been prepared by one or more subsidiaries of Bank of America Corporation for the client or potential client to whom such materials are directly addressed and delivered (the "Company") in connection with an actual or potential mandate or engagement and may not be used or relied upon for any purpose other than as specifically contemplated by a written agreement with us. These materials are based on information provided by or on behalf of the Company and/or other potential transaction participants, from public sources or otherwise reviewed by us. We assume no responsibility for independent investigation or verification of such information (including, without limitation, data from third party suppliers) and have relied on such information being complete and accurate in all material respects. To the extent such information includes estimates and forecasts of future financial performance prepared by or reviewed with the managements of the Company and/or other potential transaction participants or obtained from public sources, we have assumed that such estimates and forecasts have been reasonably prepared on bases reflecting the best currently available estimates and judgments of such managements (or, with respect to estimates and forecasts obtained from public sources, represent reasonable estimates). No representation or warranty, express or implied, is made as to the accuracy or completeness of such information and nothing contained herein is, or shall be relied upon as, a representation, whether as to the past, the present or the future. These materials were designed for use by specific persons familiar with the business and affairs of the Company and are being furnished and should be considered only in connection with other information, oral or written, being provided by us in connection herewith. These materials are not intended to provide the sole basis for evaluating, and should not be considered a recommendation with respect to, any transaction or other matter. These materials do not constitute an offer or solicitation to sell or purchase any securities and are not a commitment by Bank of America or any of its affiliates to provide or arrange any financing for any transaction or to purchase any security in connection therewith. We assume no obligation to update or otherwise revise these materials. These materials have not been prepared with a view toward public disclosure under state or federal securities laws or otherwise, are intended for the benefit and use of the Company, and may not be reproduced, disseminated, quoted or referred to, in whole or in part, without our prior written consent. These materials may not reflect information known to other professionals in other business areas of Bank of America and its affiliates.

Bank of America Corporation (the parent company of Banc of America Securities LLC and Merrill Lynch & Co., Inc.) and its affiliates (collectively, the "BAC Group") comprise a full service securities firm and commercial bank engaged in securities, commodities and derivatives trading, foreign exchange and other brokerage activities, and principal investing as well as providing investment, corporate and private banking, asset and investment management, financing and financial advisory services and other commercial services and products to a wide range of corporations and individuals, domestically and offshore, from which conflicting interests or duties, or a perception thereof, may arise. In the ordinary course of these activities, parts of the BAC Group at any time may invest on a principal basis or manage funds that invest, make or hold long or short positions, finance positions or trade or otherwise effect transactions, for their own accounts or the accounts of customers, in debt, equity or other securities or financial instruments (including derivatives, bank loans or other obligations) of the Company, potential counterparties or any other company that may be involved in a transaction. Products and services that may be referenced in the accompanying materials may be provided through one or more affiliates of Bank of America. Capital markets and investment banking services are provided by Banc of America Securities LLC and/or Merrill Lynch, Pierce, Fenner & Smith Incorporated, which are broker-dealers registered with the Securities and Exchange Commission and members of the Financial Industry Regulatory Authority and the Securities Investor Protection Corporation.

We have adopted policies and guidelines designed to preserve the independence of our research analysts. These policies prohibit employees from offering research coverage, a favorable research rating or a specific price target or offering to change a research rating or price target as consideration for or an inducement to obtain business or other compensation. We are required to obtain, verify and record certain information that identifies the Company, which information includes the name and address of the Company and other information that will allow us to identify the Company in accordance with the USA Patriot Act (Title III of Pub. L. 107-56 (signed into law October 26, 2001)) and such other laws, rules and regulations.

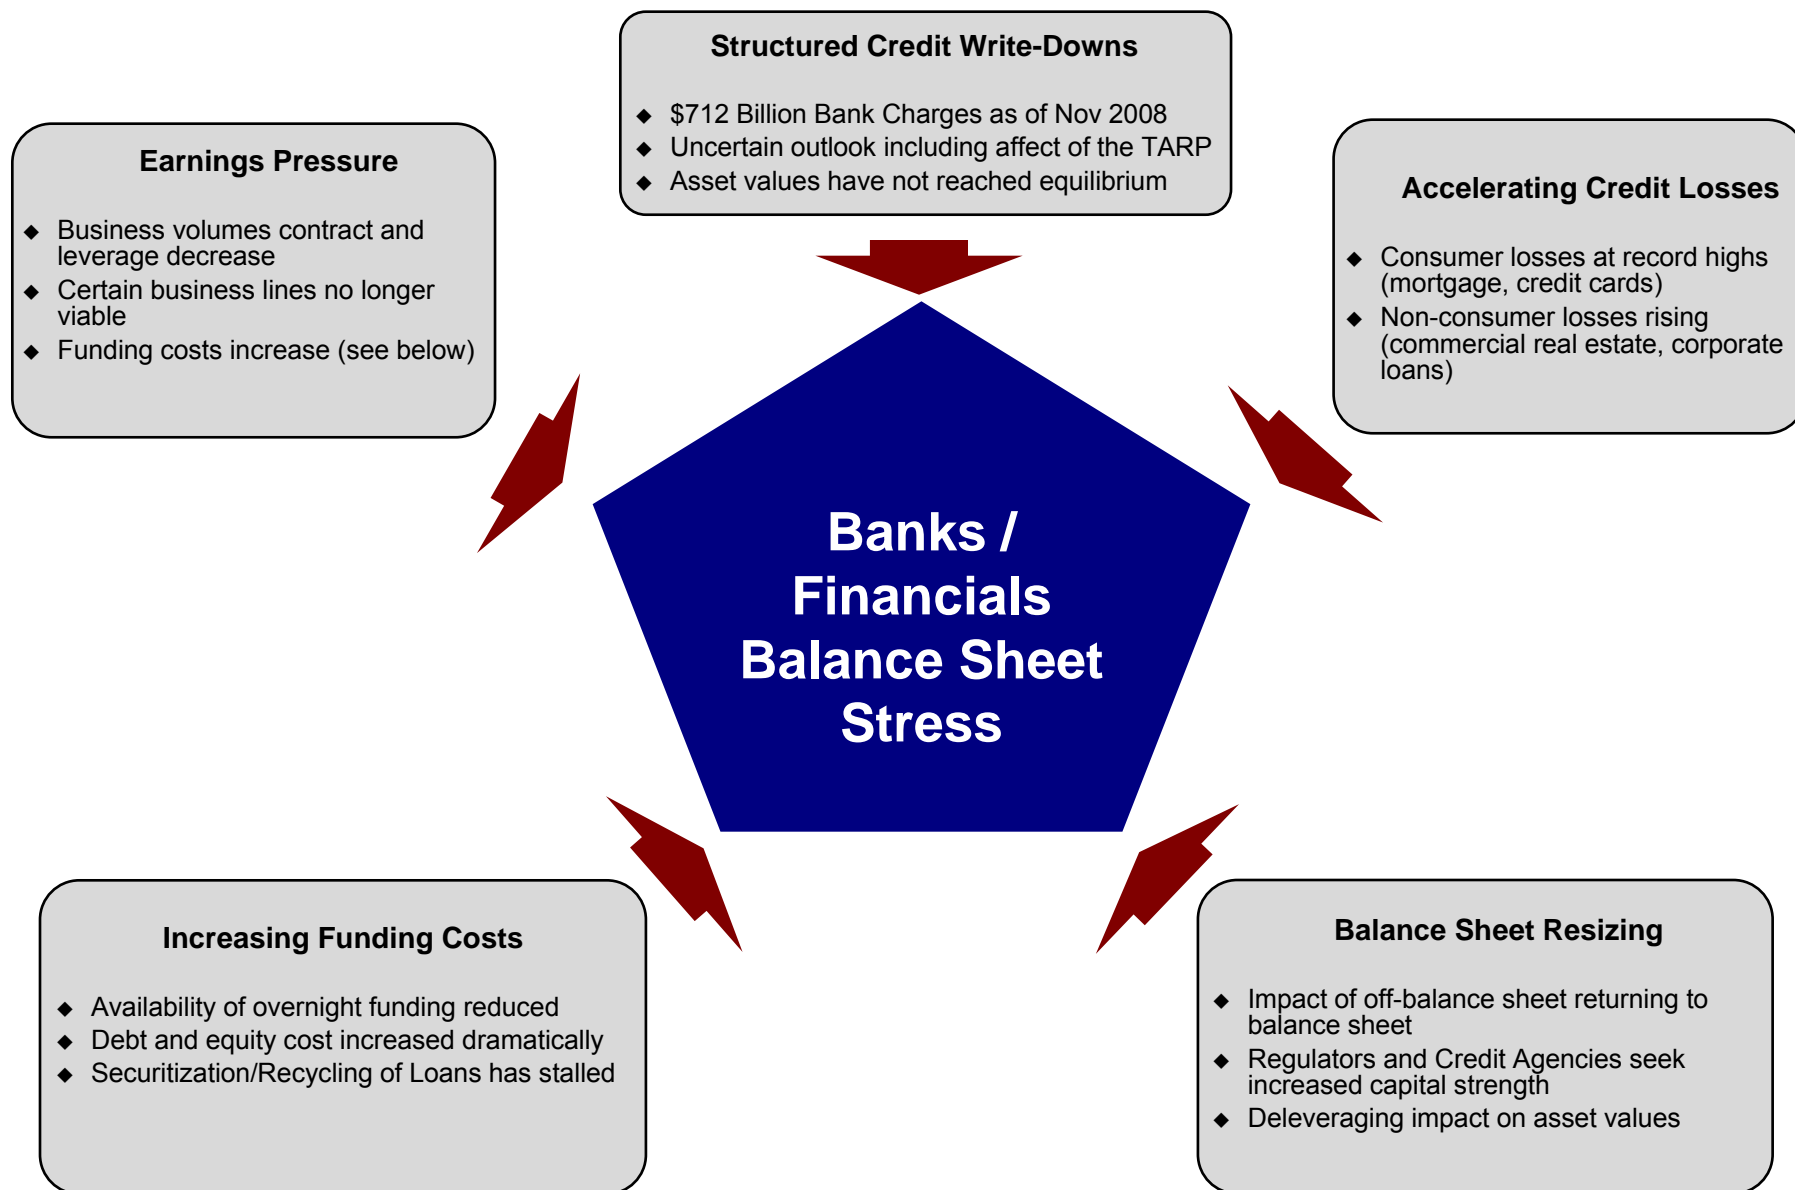

We do not provide tax advice. Accordingly, any statements contained herein as to tax matters were neither written nor intended by us to be used and cannot be used by any taxpayer for the purpose of avoiding tax penalties that may be imposed on such taxpayer. If any person uses or refers to any such tax statement in promoting, marketing or recommending a partnership or other entity, investment plan or arrangement to any taxpayer, then the statement expressed herein is being delivered to support the promotion or marketing of the transaction or matter addressed and the recipient should seek advice based on its particular circumstances from an independent tax advisor. Notwithstanding anything that may appear herein or in other materials to the contrary, the Company shall be permitted to disclose the tax treatment and tax structure of a transaction (including any materials, opinions or analyses relating to such tax treatment or tax structure, but without disclosure of identifying information or, except to the extent relating to such tax structure or tax treatment, any nonpublic commercial or financial information) on and after the earliest to occur of the date of (i) public announcement of discussions relating to such transaction, (ii) public announcement of such transaction or (iii) execution of a definitive agreement (with or without conditions) to enter into such transaction; provided, however, that if such transaction is not consummated for any reason, the provisions of this sentence shall cease to apply.

The Domino Effect– How the Credit Market Unraveled

Balance Sheet Stress for Financial Institutions

Fundamental Restructuring of Financial Sector → Fewer banks, Reduced Lending Capacity

Bank Failures

Government Interventions

Mega Mergers

(a) Writedowns as of November 2008.

Balance Sheet: a New Reality (a)

(\$bn)	Pre-tax writedown	Capital Raising
Wachovia	\$97	\$50
Citi	65	116
Merrill Lynch	62	58
Washington Mutual	46	11
UBS	44	37
HSBC	33	5
Bank of America	27	56
J.P. Morgan	21	46
Morgan Stanley	16	25
RBS	15	49
Lehman Brothers	14	14
IKB	13	11
Deutsche Bank	12	6
Credit Suisse	10	12
HBOS	9	23
Credit Agricole	9	11
Barclays	7	26
Other	212	179
Total (as of November 2008)	\$712	\$735

- > Thru 11/08, banks have taken ~\$712bn in write-downs mostly related to losses on mortgage backed securities. In response, banks have raised an extraordinary \$735bn of new capital;
- > As banks reduce balance sheet risk (including investment banks becoming bank holding companies) there is a large, adverse multiplier effect on capital available for lending activities

Government Lends a Hand and \$

CONGRESS / TREASURY

- ◆ **Housing and Economic Recovery Act (HERA) – 7/30/2008**
 - Homeowners can refinance into FHA loans w principal write-down
- ◆ **FNM/FRE Conservatorship – 9/7/2008**
 - Government Sponsored Enterprise (GSE) Credit Facility
 - GSE Senior Preferred Stock & MBS Purchase Agreement
- ◆ **Guarantee Program for Money Market Funds – 9/19/2008**
 - Guarantees participating money funds from breaking the buck
- ◆ **Troubled Asset Relief Program (TARP) – 9/28/2008**
 - Capital purchase program to buy troubled assets or preferred shares from U.S banks and thrifts
- ◆ **Emergency Economic Stability Act (EESA) – 10/3/2008**
 - Creates the troubled asset program (TARP)
- ◆ **FDIC Deposit Insurance Limit Increase – 10/3/2008**
 - Increases Account Limit to \$250,000 from \$100,000
- ◆ **Temporary Liquidity Guarantee Program (TLGP) – 10/14/2008**
 - FDIC guarantees newly issued Senior Unsecured debt of banks, thrifts and certain holding companies
- ◆ **Term-Asset Backed Securities Loan Facility (TALF) – 11/25/2008**
 - Fed provides \$200 Bn in loans to lend against AAA rated ABS
- ◆ **Expected Fiscal Stimulus Under Discussion**
 - Expected to include large infrastructure component

FEDERAL RESERVE

- ◆ **Term Auction Facility (TAF) – 12/12/2007**
 - Overnight loan facility that provides funding
- ◆ **Term Securities Lending Facility (TSLF) – 3/11/2008**
 - Provides loans over a 1-month term against eligible collateral
- ◆ **Primary Dealer Credit Facility (PDCF) – 3/16/2008**
 - Overnight loan facility funding a range of eligible collateral
- ◆ **Foreign Currency Swaps – 9/18/2008**
 - Unlimited currency swaps w central banks including ECB
- ◆ **Asset Backed Commercial Paper Money Market Fund Liquidity Facility (AMLF) – 9/19/2008**
 - Banks borrow from the Fed to purchase ABCP from money market funds at amortized cost and zero risk weighting
- ◆ **Commercial Paper Funding Facility (CPFF) – 10/7/2008**
 - The Fed buys 3-month commercial paper from Tier 1 issuers
- ◆ **Money Market Investor Funding Facility (MMIF) – 10/21/2008**
 - Fed buys CP, bank notes and CDs to 90 days maturity from money market funds
- ◆ **GSE Debt and MBS Purchase Program – 11/25/2008**
 - Fed buys Fannie, Freddie & Home Loan Debentures and Agency MBS

High Grade Loan Market Overview

Market Conditions

- ◆ High grade demand is severely constrained, with the forward calendar at near a record low of \$874 MM
- ◆ This has resulted in sharp declines in volume and tenor alongside increasing spreads and structural requirements. Lender friendly conditions are expected to continue in 2009, given economic conditions
- ◆ In tandem with the leveraged loan market, an intense focus on risk and return is driving spreads wider, CDS based pricing, which is used to ensure risk appropriate returns, is increasingly common
- ◆ Financial sector specific concerns have had particular negative ramifications for these borrowers looking to raise capital
- ◆ Shorter dated facilities became the new norm in 2008, reversing the trend of long-term commitments, which were favored from 2004 through 2007

Takeaway

- ◆ Market remains weak with lenders focused on capital preservation and risk/return
- ◆ In general, pricing is moving up for incremental dollars on all but the highest rated investment grade deals or those with exceptionally strong bank relationships.
- ◆ A key factor in determining the market clearing price is the expected usage under the facility, which can significantly boost relationship return. In addition, investors are increasingly vocal with regard to ancillary business opportunities

MULTI-YEAR FACILITIES

HIGH GRADE NEW MONEY VOLUME

TENOR BASED DISTRIBUTION (a)

High Grade Debt Market Overview

- ◆ The "Golden Age" for investment grade issuers, which peaked in 2005 when credit spreads and financing costs reached a 35-year low, ended with the onset of the credit crisis in July 2007
 - With credit in short supply, liquidity is harder to come by and the cost of funding across the capital structure has increased substantially
- ◆ Rapid deterioration in the financial sector and corporate credit markets during 3Q '08 brought a historic wholesale widening of credit spreads, a slowdown in high grade new issue supply and a standstill in secondary trading activity
 - Institutional investors have exhibited a preference for large, liquid transactions from high-quality, defensive industrial issuers. Market depth for BBB names has improved but access still remains credit specific

2009 Economic Forecast

COMMENTARY

- ◆ As long as mortgage credit remains unavailable and the mortgage market dysfunctional, the possibility is that housing markets will “overshoot” to the downside
- ◆ The Fed is expected to delay raising rates until the economy is back on sound footing and the economy has turned
- ◆ Maturities take center stage in 2009 as credit availability, and thus the ability to refinance, remains constrained
- ◆ For financials, issuance under various government programs expected to keep balance sheets liquid
- ◆ The biggest challenge is for high yield companies as funding remains extremely limited
- ◆ Given the underlying economic recession issuers in cyclical sectors are expected to face the most challenges compared to non-cyclicals even with similar rating
- ◆ **However, for high grade issuers even with record level of spreads, the low absolute level of interest rates keeps the after tax cost of debt attractive meaning issuers will still look to tap debt financing, especially to reduce exposure to the short term debt market**

SIGNS OF MARKET RECOVERY

- ◆ Inflation expectations have tumbled, clearing the way for the Fed’s ongoing aggressive easing campaign
- ◆ CDS levels of financial companies have moderated from recent highs
- ◆ LIBOR levels have moderated and commercial paper has begun to follow suit, partially reopening the credit markets
- ◆ LBO overhang in the leveraged loan and high yield markets is essentially gone

Current Utility Themes

Recent financial market volatility forcing reassessment of strategic and financial plans with standalone CPG viability questioned

Industry Dynamics	<ul style="list-style-type: none"> ◆ Despite tightening reserve margin expectations, environmental issues are limiting new generation development, particularly coal ◆ RPS in 29 states, plus potential Federal standards will create incremental capital needs and place further pressure on costs to customers ◆ Nuclear renaissance is a potential alternative, but capital intensity and long construction period precludes many utilities from participating ◆ Energy efficiency regaining focus given high costs of fuel commodity and rising base utility rates ◆ Large capital programs given prolonged under-investment in infrastructure <ul style="list-style-type: none"> • Capital programs being delayed due to Economy ◆ Regulatory challenges due to volatile commodity prices (both fuel and construction materials) and operating costs <ul style="list-style-type: none"> • Increased costs/investment recovery will pressure earned and allowed returns 	<ul style="list-style-type: none"> ◆ Weak credit profiles and turbulent capital markets bring into question long-term viability of standalone CPGs ◆ 3 of 7 public CPGs have publicly announced they are “reviewing strategic alternatives”
Liquidity / Capital Markets	<ul style="list-style-type: none"> ◆ Credit crisis has impaired availability of capital to all companies and raised cost of all forms of capital ◆ Liquidity is current focal point of management and investors ◆ Utility and CPG stocks have moved significantly lower with overall equities – reflecting global market considerations ◆ Spreads have widened considerably in high grade debt markets forcing issuers to reconsider spread and coupon targets, however, all in funding costs benefit from new lows for Treasuries 	<ul style="list-style-type: none"> ◆ Non-investment grade markets effectively closed thru 4Q'08, now thawing for best non-investment grade issuers
Strategic Positioning	<ul style="list-style-type: none"> ◆ Companies continue to focus on regulated activities and rationalize diversified activities ◆ Large capital programs and need for rate relief expected to mitigate pace of large-scale U.S. utility consolidation 	<ul style="list-style-type: none"> ◆ Sale of non-core assets to bolster liquidity, fund development projects or potentially return cash to investors
M&A	<ul style="list-style-type: none"> ◆ “Inbound” X-border M&A to continue when dynamics create financial rationale (relative valuations, weak US\$) for US acquisitions ◆ Regulated utility M&A will be challenged by regulatory and financial factors <ul style="list-style-type: none"> • Multi-state deals will continue to be difficult to transact • Regulators will aggressively seek to retain synergies in transactions to offset rate increases ◆ Foreign buyers and infrastructure funds interested in single state utilities with significant capital investment opportunities (e.g. - Puget) 	<ul style="list-style-type: none"> ◆ Consolidation of CPGs accelerating as distress in capital markets threatens viability ◆ Significant cost and operating synergies in large-scale CPG consolidation ◆ Financial owners will sell as assets approach equilibrium value

What are the Primary Issues on Minds of Utility Investors

- > Liquidity profile of Utilities
- > Impact of financial crisis on utility fundamentals
 - Will regulators increase allowed returns to reflect increased capital costs (particularly during period of increasing operating costs)?
 - Will Utilities be able to access capital required to support operations and investment plans?
- > Impact of volatility of commodity cost on utilities?
- > Potential for demand destruction given economic weakness?

POWER & UTILITIES INDUSTRY: RELATIVE CREDIT PROFILE 1998 - 2008

EQUITY FUND FLOWS

FREE CASH FLOW DEFICIT (\$BN)

Implications of Challenged Capital Raising Environment

Recent financial market volatility has created a challenging capital raising environment: Access to capital will be dependant on taking a proactive and flexible approach to managing financial objectives and accepting the increased cost of doing business

- Liquidity / Capital Planning Playbook

 - ◆ Review adequacy of liquidity position under various scenarios
 - ◆ Scale back/defer capital investment programs
 - ◆ Drive value through consolidation and asset sales
 - ◆ Adjust cost of capital and internal hurdle rates to reflect higher cost of capital
 - ◆ Accessing market in “just-in-time” fashion is a recipe for trouble – liquidity and access to markets can quickly disappear
 - Extend debt maturity profile through early refinancing, extension trades and pre-fundings whenever there are windows of opportunity
 - Consider multiple sources of capital (e.g. non- traditional)
 - ◆ Strengthen core bank group relationships while reducing reliance on banks
 - Maintain multiple contacts within each financial partner
 - Understand the requirements for credit extension
 - ◆ Assess counterparty risk
 - ◆ Review capital structure in light of increased volatility and cost of capital
 - ◆ Proactively anticipate rating agency concerns
 - ◆ Review cash management and treasury operations
- Cost of Capital Impact

 - ◆ Market risk premiums have increased for both debt and equity (Increasing the cost of capital)
 - Cost of debt has increased
 - Cost of equity derived under various methodologies has increased, although CAPM is not representative of current market conditions (risk free rate, beta and equity risk premium challenges)
 - Overall cost of funding (WACC) has increased
