Objet: Hydro Quebec Smart meters installations

Ref.: **Case Reference numbers : R-3863-2013 R -3854-2013**

Mme Pelletier,

For the installation of hydro smart meter on my property, hydro quebec has written several letters to me and I have replied with registered letters to the director of Hydro Quebec on this project refusing the installation for many reasons (such as headaches, etc.). Hydro Quebec does not respect my refusal, instead they call again and again through a contractor to book an appointment for the installation. This is harassment!

My neighbour (with kids 3 and 5 years old) did the same thing as I did to avoid the installation for their reasons. They had put posters on the house entrance and on their meter, just like I did, refusing the installation. But their meter is outside of the fence. I started getting headaches and I looked out of the window to check their meter. There I saw that hydro had changed their meter. I immediately informed my neighbour about it. They were shocked.

Now I am getting severe headaches which I did not get before and I believe that is because I am now sandwiched between the two houses having these smart meters. As a citizen, I hope my rights will be respected. Thank you.

Ros D'Cruz
