Dear Mme Pelletier,

I heard that the smart meters were getting installed in our area and that it was not good for health. I decided to educate myself and so I attended information sessions on the smart meters and the health effects. I found to my astonishment that Research had shown the meters which were installed in the US and due to the adverse health issues they were fighting and are in the process of changing their meters back. It seems a waste of money and the authorities are callous not to care about how it will affect the people. Rumor has it that the meters were already invested in and so there was a lot of money at stake.

We refused the installation as we did not want to be radiated with microwaves radiation. I was over at a friend's place who had a meter and in 10 to 15 minutes I felt uncomfortable and sick and I had to leave. I would certainly not like to have it on my home. Please Madam See that my rights are respected and that I am not forced to install it. Thank you.

Yours truly,
Philomena Carvalho.
