**RE: Application concerning the generic file for the allocation of costs and rate structure of Énergir
Files R-3867-2013 Phase 2B**

The Régie de l'énergie (the Régie) has examined the letter from Énergir, filed on 3 April 2020 in the case cited above, concerning the information requested by the Régie in its decision D-2020-006.^[1]

In its letter, Énergir states that it intends to amend its initial proposal concerning the method used to functionalize supply costs to support the application of the three-tier method described in the report by Elenchus (the Report). In addition, the Distributor will present further evidence on the discussion points raised in the Report that were not addressed in its initial evidence.

Énergir plans to complete the amendment of its evidence during the summer of 2020. In the meantime it states that it will be available to discuss the amendment of its evidence at a preparatory meeting on the implementation and timeframe for Phase 2B.

The Régie will convene Énergir and the other participants to a preparatory meeting in the coming days, providing more details on the meeting format later. For this purpose, it would like to receive preliminary comments **no later than 23 April 2020 at 12 noon**. The Régie also asks the participants to indicate the technical means at their disposal to take part in the preparatory meeting from a remote location.

Yours sincerely,

Véronique Dubois, attorney
Secretary of the Régie de l'énergie
VD/ml
