Objet : A very concerned Montrealer.

Dear sir or madam

My name is Wendy Burke . I was born and raised in this great province, which I am very proud to be part of . I always tell people when they ask me why do I like living in Montreal, that I love living in Montreal , QUEBEC , because the people , the spirit ,this place we call home, this place where we wage our arguments over language , is a great place to live, it is beautiful , it is culture , it is history . On my Twitter I refer to my self , as a MONTREALER FOR LIFE.

That being said , as a Montrealer , I am also live way below the poverty line.

I can barely afford where I live now . Usually by mid month to the end of the month I have no food left to feed myself. I have heard about HYDRO QUEBEC'S wanting to increase the hydro rates yet again , to the highest they have been in almost 30 years. I am asking , with much respect to you that you REFUSE or DENY this request. HYDRO QUEBEC has to be made much more accountable, that is , made to show you " their books" to prove such an exorbitant increase is warranted .

Many here in Montreal are living below the poverty line. Many of us are struggling to have a good life. If you agree to this increase, the struggle for all of us, will be even worse than ever.
