Objet: Dossier R-3964-2016 keep my analogue meter

From : Domenica Mariotti 2231 de Baccarat Laval QC. H7M 5S5

To whom it may concern:

I want to keep my my analogue meter because I am electrosensitivie and this meter does not emit radio frequencies. Smart meters have caused many fires and I have a big propane tank near my meter installation.

I also agree with RAPLIQ that analogue meters should be included as an opt-out option just like in the USA.

The non- communicating meters also poses some problems because they emit high transient frequencies creating dirty electricity. Since I am electrosensitivie, I prefer to avoid such a device.

We must also not forget that we have a Canadian Charter of Rights and Liberties , Article 7 and Article 8. Therefore I have the right to keep my analogue meter.

I also request to publish my letter on your website.
