**AFFIDAVIT OF CITIZEN MURRAY ABRAMOVITCH**

I, Murray ABRAMOVITCH, residing at 253 Rue de Barcelone, in the city of Dollard-des-Ormeaux, district of Montreal, province of Quebec, H9B 0A6, affirm the truthfulness of the following:

1. I am a citizen affected by the application for a review of Board Decision D2016-013.

**The application for a stay**

2. I seek a stay of Decision D2016-013 since I was prevented from asserting my rights in the hearing leading up to the contested decision;
3. The decision was rendered without a fair debate on the assertions of the Hydro-Québec carrier and distributor that I challenge;
4. No neighbor, friend or relative informed me that they had seen the Régie's opinion and had seen it, the notice contained no indication of the transmission line to be erected metres from my home;
5. In so doing, the inadequacy, the lack of effective notice and the denial of justice suffer my rights to a fair, impartial and transparent procedure;
6. The decision itself authorizes a project that potentially affects my health and infringes upon my right of ownership, without my having been able to make a full and complete defense of the proposed neighborhood and without being able to say a word to the Régie which authorized the Hydro Project;

7. As a result of congestive heart failure, a pacemaker – cardioverter – defibrillator (ICD) was implanted in my chest. Since it was implanted to prevent sudden cardiac arrest and since it can deliver therapeutic shocks, it is of critical importance that I avoid harmful electromagnetic fields. Electromagnetic interference (EMI) would vary widely depending on whether these overhead transmission lines are in regular, full production or emergency mode, which could multiply the potential for electromagnetic interference many times over.

8. The prejudice of such a decision and the harm if the stay is not granted is irreparable in that the potential damage to my health and to our place of residence will be crystallized as soon as the construction of the project begins;

9. In addition to these damages and because of this denial of access to and submission of my arguments at the hearing of the application, the Régie was deprived of essential information which Hydro did not submit to it on the actual costs of the project;

10. It is therefore essential that the true costs to society be known before construction begins;

11. The stay and subsequent hearing of the applicants would prevent considerable and irrecoverable public expenditure for Québec society and would allow a more precise and realistic study of the project;

And I signed,

Murray ABRAMOVITCH

Solemnly proclaimed in front of me in Montreal on this 7<sup>th</sup> day of ~~June~~ 2017.
