never less than the contract power defined in Article 5.3.	never less than the contract power defined in Article 5.3.	
5.5 Condition related to the power factor for power demand less than 5,000 kilowatts	5.5 Condition related to the power factor for power demand less than 5,000 kilowatts	
If, during a consumption period, the maximum power demand exceeds the highest real power demand, which is less than 5,000 kilowatts, Hydro-Québec applies the demand charge to the difference between:	If, during a consumption period, the maximum power demand exceeds the highest real power demand, which is less than 5,000 kilowatts, Hydro-Québec applies the demand charge to the difference between:	
a) the maximum power demand up to 5,000 kilowatts; and	a) the maximum power demand up to 5,000 kilowatts; and	
b) the highest real power demand.	b) the highest real power demand.	
If applicable, the credit for supply at medium or high voltage and the adjustment for transformation losses, as described in articles 10.2 and 10.4, apply.	If applicable, the credit for supply at medium or high voltage and the adjustment for transformation losses, as described in articles 10.2 and 10.4, apply.	
5.6 Optimization charge	5.6 Optimization charge	
If in a day during the winter period the maximum power demand exceeds 110% of the contract power, the overrun is subject to a daily optimization charge of \$7.53 per kilowatt. For each day during which such an overrun occurs, the charge will be applied to the number of kilowatts making up the highest overrun during the day.	If in a day during the winter period the maximum power demand exceeds 110% of the contract power, the overrun is subject to a daily optimization charge of \$7.53 ^{\$7.56} per kilowatt. For each day during which such an overrun occurs, the charge will be applied to the number of kilowatts making up the highest overrun during the day.	
For each consumption period, however, the amount calculated by applying the daily optimization charges is limited to the amount that would result from applying a monthly optimization charge to the portion of the billing demand exceeding 110% of the contract power. This optimization charge is \$22.59 per kilowatt.	For each consumption period, however, the amount calculated by applying the daily optimization charges is limited to the amount that would result from applying a monthly optimization charge to the portion of the billing demand exceeding 110% of the contract power. This optimization charge is \$22.59 ^{\$22.68} per kilowatt.	
For purposes of this article, a day is defined as a 24-hour period beginning at 00:00.	For purposes of this article, a day is defined as a 24-hour period beginning at 00:00.
