Régie de l'énergie

## APPLICATION FOR APPROVAL OF THE 2020-2029 SUPPLY PLAN OF THE DISTRIBUTOR (FILE R-4110-2019)

The Régie de l'énergie (the **Régie**) will hold a public hearing to study the application by Hydro-Québec in its electricity distribution activities (the **Distributor**) for approval of its 2020-2029 supply plan. This application is submitted by virtue of Section 72 of the *Act Respecting the Régie de l'énergie*.

According to the Distributor, the integrated network supply plan anticipates an increase in demand for electricity in Québec over the 2020-2029 period. The available and projected supply is sufficient, according to the Distributor, to meet energy needs until 2026 and power demand until 2025. The supply plan for autonomous networks, according to the Distributor, follows an action for total or partial conversion of autonomous networks to less expensive and cleaner sources of energy.

### REQUESTS TO INTERVENE

Any person interested in participating in the public hearing should send an application for intervenor status to the Régie, along with, as applicable, a budget for the intervention **no later than 12:00 p.m. on December 6, 2019**. This application must be made in conformity with the *Rules of Procedure of the Régie de l'énergie*, a text which is accessible on the Régie's website, and following the instructions of the Régie as outlined in its Decision D-2019-157. It must be sent to the Distributor by the same deadline.

The application by the Distributor, the related documents, the *Rules of Procedure of the Régie de l'énergie*, as well as the procedural decision D-2019-157, can be found on the Régie's website at <http://www.regie-energie.qc.ca>.

The Régie can be contacted for any information by telephone, fax or email.
