Requête 4194-2022

2023 & 2024 Prime Rate Forecast

Overview

A consensus forecast is used to estimate the prime rate charged by commercial banks. As the prime rate is subject to competitive pressures faced by individual lenders and is set on an individual financial institution basis, the effective interest rate is not widely forecast.

However, the prime rate shares a consistent relationship with the Bank of Canada’s overnight interest rate target (or the “overnight rate”) which is a widely forecasted data series. To provide a reasonable estimate of the prime rate, the consensus view of the overnight rate is used as a proxy.

Process

Overnight Rate Forecast

A consensus approach is used to establish the overnight rate forecast. Six major Canadian financial institutions¹ views of the overnight rate target are provided multiple times throughout the year. In most cases, projections are published over a two-year horizon which allows for a 24-month consensus forecast.

Table 1 displays the six financial institutions’ forecasts of the overnight rate for the remainder of 2023 and 2024, as of April 19, 2023:

TABLE 1: Overnight Rate Forecasts by Six Canadian Financial Institutions

	BMO Capital Markets	CIBC Economics	Desjardins Economic Studies	RBC Economics Research	Scotiabank	TD Economics	Average
	FORECAST DATE:						
	14-Apr-23	19-Apr-23	16-Mar-23	1-Apr-23	17-Mar-23	28-Mar-23	2023 Q1
2023 Q1	4.50	4.50	4.50	4.50	4.50	4.50	4.50
2023 Q2	4.50	4.50	4.50	4.50	4.50	4.50	4.50
2023 Q3	4.50	4.50	4.50	4.50	4.50	4.50	4.50
2023 Q4	4.50	4.50	4.25	4.50	4.50	4.50	4.46
2024 Q1	4.25	4.00	3.50	4.00	4.00	4.00	3.96
2024 Q2	4.00	3.50	3.00	3.50	3.50	3.50	3.50
2024 Q3	3.75	3.25	2.50	3.25	3.00	3.00	3.13
2024 Q4	3.50	3.00	2.50	3.00	3.00	2.50	2.92

To determine an average that is representative of the overnight lending rate, a few considerations are made:

1. The Bank of Canada increases/decreases the overnight rate in 25 basis point increments.²

¹ The following six Canadian Financial Institutions are considered: BMO – Capital Markets, CIBC – Economics, Desjardins – Economic Studies, RBC – Economics Research, Scotiabank Group, TD – Economics.

² Since August 9, 1996 the Bank of Canada has adjusted the overnight rate by increments of base 25.

2. The Bank of Canada decides to increase/decrease the overnight rate each year on eight (8) predetermined dates.³

Recognizing the Bank of Canada’s mechanism for setting the overnight rate is important since the aim of this forecast is to closely mimic the process used by the Bank of Canada to arrive at a reasonable estimate of the overnight rate.

To satisfy this, the average quarter-end overnight rate forecast as determined in Table 1 is then rounded to the nearest 25-basis points. Table 2 displays the average quarter-end forecast of the consensus group rounded to the nearest 25 basis points:

**TABLE 2: Average Quarter-End Overnight Rate
Forecast Rounded to Nearest 25 bps**

	Average	Rounded to Nearest 25 bps
FORECAST DATE:		
	2023 Q1	2023 Q1
2023 Q1	4.50	4.50
2023 Q2	4.50	4.50
2023 Q3	4.50	4.50
2023 Q4	4.46	4.50
2024 Q1	3.96	4.00
2024 Q2	3.50	3.50
2024 Q3	3.13	3.25
2024 Q4	2.92	3.00

The next step in the process is to generate the expected overnight rate on the rate announcement dates based on the adjusted consensus quarterly forecasts.

Drawing on the average quarter-end view of the forecasters rounded to the nearest 25 basis points, and considering the eight dates on which rate announcements will take place, Figure 1 and Figure 2 display the daily expected overnight rate for 2023⁴ and 2024, respectively, where the same announcement dates are assumed for 2024.

³ Example of the Bank of Canada’s Interest Rate Announcement Schedule for 2023: <http://www.bankofcanada.ca/core-functions/monetary-policy/key-interest-rate/>. Note that February, May, August and November have no scheduled rate announcement.

⁴ January 2023 - April 2023 are actual data.

Note: Yellow highlights indicate rate announcement where 2024 dates assume 2023 rate announcement schedule.

Daily projections of the overnight rate from Figure 1 and Figure 2 are rolled up to determine the monthly, quarterly and yearly averages in Figure 3. Note that January - April 2023 are actual data.

† *Red Italics* indicate month in which no interest rate announcement is scheduled.

Dashed line (-----) indicates quarter-end.

* Monthly, Quarterly and Yearly forecasts are averages of the daily rate, rounded to two decimal places.

Prime Rate Differential

Table 3 on the next page displays the recent historical relationship between the monthly average of overnight rate and prime rate data series extracted from Statistics Canada’s CANSIM II database. The overnight rate target is rounded to the nearest 25 basis points and the prime rate is rounded to the nearest 5 basis points.

Prime Rate Forecast

Since 2020, the mode (most frequent occurring value) of differential between the prime rate and the overnight rate has remained at 220 basis points including the time new rates were announced by Bank of Canada. We expect that the current differential of 220 basis points to remain for the duration of this forecast period.

Adding the 220-basis point differential to the overnight rate forecasts from May 2023 to December 2024 results in the prime rate forecasts shown in Figure 4.

*Note: January 2023 to April 2023 rates are actual values.

Overall

The prime rate is the rate commercial banks charge on loans to their best customers. Financial institutions set their own prime rates based on the cost of short-term funds and based on the competitive pressures among them.

A consensus view from financial institutions is used to forecast the prime rate. However, the prime rate is not widely forecast, so an approach to arrive at a reasonable forecast of the prime rate is needed. Conveniently, the prime rate shares a consistent relationship with the Bank of Canada's overnight rate. The overnight rate is widely forecast, and through a consensus view of overnight rate expectations, a prime rate forecast can be generated.

Forecasting of the overnight rate through a consensus approach requires consideration of the overnight rate setting mechanism used by the Bank of Canada. This process includes forecasting eight (8) interest rate announcements during a given year and ensuring that any expected interest rate change at those announcement dates is made in the order of 25 basis points.

Finally, determining the consistent relationship between the reported prime rate and the overnight rate, and then applying this differential to the overnight rate forecast, yields the prime rate forecast. Although the prime rate has deviated slightly from its relationship to the overnight rate recently, the relationship is expected to hold over the long term. The prime rate is forecast to remain at 220 basis points above the overnight rate for the duration of the forecast period.

GAZIFÈRE INC.
EVIDENCE TO SUPPORT GAZIFÈRE DEBT ISSUANCE PROCESS AND
COST OF BORROWING
2024 Rate Case

This evidence is provided to describe in more detail the methodology used to determine Gazifère's debt costs.

General Approach

Gazifère derives the cost of debt using a Government of Canada bond yield plus a corporate credit premium estimated by an independent financial institution with expertise and knowledge of Canadian debt capital market conditions. The financial institution estimates the premium based on the assumption that Gazifère is a stand-alone entity without a credit rating. It is common regulatory practice to have a utility's cost of debt determined on a stand-alone basis when a corporate parent provides that entity's funding.

Process of Estimating the Premium on Cost of Debt

When estimating the premium that should be applied to the cost of debt, the financial institution assesses several factors. These factors include:

- Premiums of comparable companies in the industry
- Nature of the business and nature of the entity's assets
- Financial strength of the entity
- Size of the entity
- Size of the potential debt issue and market access

Several of the above factors warrant further discussion:

1) Size of the entity

The size of an entity is relevant because a smaller entity faces greater exposure to one-time events. This factor is supported by the fact that rating agencies generally will assess the size of entity when determining a credit rating.

A smaller entity has a higher risk profile from a credit perspective than a larger entity, which results in an additional premium applied by the debt market to the cost of debt.

2) Size of the potential debt issue and market access

The size of the debt issue will impact the market accessibility of the entity. To access liquid public debt markets, an entity typically requires a credit rating and the principal amount of the debt will need to be of a sufficient size to justify the expense of issuing the debt and maintaining on-going financial reporting and disclosure obligations under securities legislation and regulations. An entity with no credit rating that issues a small tranche of debt will not be able to cost-effectively access liquid public debt markets. As

GAZIFÈRE INC.
 EVIDENCE TO SUPPORT GAZIFÈRE DEBT ISSUANCE PROCESS AND
 COST OF BORROWING
 2024 Rate Case

such, a private placement transaction will be the primary funding alternative for an unrated entity issuing small tranches of debt.

In general, by nature the private placement market contains a smaller buyer universe than for a public transaction. As such, investors for private placements will tend to have more negotiating power and the credit spread will be a key area of negotiation between the borrower and the investors. Thus issuing debt in the private placement market will typically result in an additional premium applied to debt costs due to the illiquid nature of the market. Gazifère has relied upon an independent Indicative Credit Spread assessment by RBC Capital Markets, a leading Canadian Investment Bank (See exhibit GI-38, document 3.1). RBC has included a private placement premium in their credit spread estimate of 25-50 bps.

Benefit to Gazifère of Borrowing from Enbridge Inc.

Gazifère does borrow from its parent, Enbridge Inc. to meet long-term funding requirements. This arrangement results in certain benefits to Gazifère. Enbridge does not pass through to Gazifère any debt issue commission costs or other fixed fees that Enbridge Inc. actually incurs, and Gazifère would incur on a stand-alone basis in a debt issue. These fixed fees include legal, filing and auditor fees that are independent of the issuance size.

If issuance fees were to be incurred by Gazifère on a small debt issue, these fees would result in 20 bps of premium being added to the debt costs. The potential impact on Gazifère debt costs for 2024 is illustrated below, using the April 2023 indicative credit spread provided in the RBC Capital Markets report:

	Debt Costs (%)	Potential Debt Costs (%)
5-year GoC bond yield per April 2023 Consensus Forecast	3.19%	
Premium	<u>2.95%</u>	
Debt Cost	<u>6.14%</u>	
Avoided additional Fees: (amortized over life of debt)		
Commission & Fixed Fees		<u>0.20%</u>
Potential Effective Debt Cost		<u>6.34%</u>
Benefit to Gazifère by borrowing from Enbridge Inc. a \$5,000,000 debt		0.20% per year for 5 years or approximately \$50,000 over 5 years

DATE: APRIL 19, 2023

SUBJECT: GAZIFÈRE INC. – INDICATIVE CREDIT SPREAD

Dear Michelle,

In response to your request for an indication on financing costs for Gazifère Inc. (“Gazifère”), this letter outlines the assumptions and methodology that RBC Capital Markets (“RBC CM”) employed in deriving our pricing indication. RBC CM’s views are based on our debt capital markets expertise, our experience in financing corporations from the energy utility sector in Canada and our ongoing knowledge of the Enbridge group of companies.

Key assumptions:

- (i) Term of 5 years;
- (ii) Principal amount of C\$10 million;
- (iii) Subordinated promissory loan;
- (iv) Assumed investment grade rating of BBB-;
- (v) Pre-payable at any time at par at the option of the issuer.

The following table outlines comparable public spreads in the energy utility industry:

Issuer	Issue	Amount	Remaining Term (Maturity / Call)	Spread Bond/Curve
Enbridge Gas Inc.	2.50% due 5-Aug-26	C\$300MM	3.3 / 3.0 (M)	94 / 92
Enbridge Gas Inc.	2.88% due 22-Nov-27	C\$250MM	4.6 / 4.3 (M)	103 / 106
Enbridge Gas Inc.	2.37% due 9-Aug-29	C\$400MM	6.3 / 6.1 (M)	121 / 121

Indicative spreads as at April 19, 2023

The following table summarizes how RBC derived the indicative credit spread for Gazifère:

Gazifère	
	5yr
Enbridge Gas Distribution Inc. new issue spread	115 bps
BBB- rating category and subordination adjustment	50 bps - 75bps
Negotiated private placement (liquidity premium)	25 bps - 50bps
Prepayment premium ⁽¹⁾	75 bps - 85bps
Indicative Spread	265 bps - 325bps
GoC Yield	3.19%
<i>Approx. Indicative Coupon</i>	5.84% - 6.44%

As at April 19, 2023

(1) Indicative premium for a cancellable pay fixed swap used as a proxy for the option value associated with a par call fixed rate instrument at each tenor taking into consideration forward rates.

At the time of issuance, pricing may be affected by other competing transactions and / or general market tone. There can be no assurance that our pricing indication will in fact result in a successfully placed offering until the terms of the transaction, validation of investment grade quality and the indicative coupon have been analyzed and accepted by fixed income investors.

We hope this clarifies the pricing methodology that was applied in arriving at an indicative coupon for Gazifère. Should you have any questions or require further clarification on any matter don't hesitate contacting me. We are pleased to have assisted you in this matter.

Best Regards,

Jamie Wetmore
