ELECTRICITY RATES EFFECTIVE APRIL 1, 2022	VERSION MODIFIÉE	JUSTIFICATION DES MODIFICATIONS
<b>Chapter 4, Section 13</b>	<b>Chapter 4, Section 13</b>	
<b>Demand Response Option</b>	<b>Demand Response Option</b>	
<b>4.73 Application</b>	<b>4.73 Application</b>	
The Demand Response Option described in this section applies to the medium-power contract of a customer who is able to reduce power demand during the winter period at Hydro-Québec’s request.	The Demand Response Option described in this section applies to the medium-power contract of a customer who is able to reduce power demand during the winter period at Hydro-Québec’s request.	
<b>4.74 Definitions</b>	<b>4.74 Definitions</b>	
In this section, the following definitions apply:	In this section, the following definitions apply:	
“ <i>average temperature</i> ”: The value in degrees Celsius of the average of the temperatures recorded at the weather station closest to the delivery point during peak hours.	“ <i>average temperature</i> ”: The value in degrees Celsius of the average of the temperatures recorded at the weather station closest to the delivery point during peak hours.	
“ <i>critical peak event</i> ”: The sequence of peak hours indicated by Hydro-Québec in the critical peak event notification sent to the customer in accordance with Article 4.79.	“ <i>critical peak event</i> ”: The sequence of peak hours indicated by Hydro-Québec in the critical peak event notification sent to the customer in accordance with Article 4.79.	
“ <i>effective interruptible power</i> ”: The value in kilowatts of the average power reductions over all the critical peak events. The effective interruptible power is calculated after the winter period.	“ <i>effective interruptible power</i> ”: The value in kilowatts of the average power reductions over all the critical peak events. The effective interruptible power is calculated after the winter period.	
“ <i>peak hours</i> ”: All hours from 06:00 to 09:00 and from 16:00 to 20:00 during the winter period, excluding:	“ <i>peak hours</i> ”: All hours from 06:00 to 09:00 and from 16:00 to 20:00 during the winter period, excluding:	
a) Saturdays and Sundays; a) December 24, 25, 26 and 31, January 1 and 2, as well as Good Friday and Easter Monday when the latter fall within the winter period.	b) Saturdays and Sundays; c) December 24, 25, 26 and 31, January 1 and 2, as well as Good Friday and Easter Monday when the latter fall within the winter period.	

ELECTRICITY RATES EFFECTIVE APRIL 1, 2022	VERSION MODIFIÉE	JUSTIFICATION DES MODIFICATIONS
<p><b>“power reduction”</b>: The value in kilowatts of the difference between reference power and real power during the critical peak event. This value cannot be negative.</p>	<p><b>“power reduction”</b>: The value in kilowatts of the difference between reference power and real power during the critical peak event. This value cannot be negative.</p>	
<p><b>“real power demand during critical peak event”</b>: The value in kilowatts of the service contract’s average real power demand during the critical peak event.</p>	<p><b>“real power demand during critical peak event”</b>: The value in kilowatts of the service contract’s average real power demand during the critical peak event.</p>	
<p><b>“reference period”</b>: Depending on whether the critical peak event occurs in the morning or evening, the peak period between 06:00 and 09:00 or between 16:00 and 20:00 during which there was no critical peak event.</p>	<p><b>“reference period”</b>: Depending on whether the critical peak event occurs in the morning or evening, the peak period between 06:00 and 09:00 or between 16:00 and 20:00 during which there was no critical peak event.</p>	
<p><b>“reference power”</b>: A value in kilowatts estimated from linear regressions of the service contract’s average real power demand based on the customer’s normal consumption profile and of the average temperature during the reference period. Hydro-Québec may adjust the reference power as needed to better reflect the customer’s normal consumption profile.</p>	<p><b>“reference power”</b>: A value in kilowatts estimated from linear regressions of the service contract’s average real power demand based on the customer’s normal consumption profile and of the average temperature during the reference period. Hydro-Québec may adjust the reference power as needed to better reflect the customer’s normal consumption profile.</p>	
<p><b>4.75 Sign-up procedure</b> To sign up for this option, the customer must submit a written request to Hydro-Québec by September 15. After analysis, Hydro-Québec may ask that modifications be made to the request.</p>	<p><b>4.75 Sign-up procedure</b> To sign up for this option, the customer must submit a written request to Hydro-Québec by September <del>15</del><sup>15</sup>. After analysis, Hydro-Québec may ask that modifications be made to the request.</p>	<p><u>Modification requise afin d’inclure la date du 30 septembre comme date limite pour soumettre une demande écrite. Voir section 4.4.</u></p>
<p>Hydro-Québec notifies the customer in writing of its decision to accept or deny the request. If it is accepted, the parties must sign an agreement for the coming winter period, specifying the service contract covered and the weather station closest to the delivery point.</p>	<p>Hydro-Québec notifies the customer in writing of its decision to accept or deny the request.
