PIÈCE DÉPOSÉE EN VERSION ÉLAGUÉE

REGISTRE DES ENTITÉS VISÉES PAR LES NORMES DE FIABILITÉ (VERSION ANGLAISE)

Register of Entities Subject to Reliability Standards

December 2015

Redacted version

Approved by the Régie de l'énergie (D-2015-213): December 21, 2015

TABLE OF CONTENTS

1. OBJECT OF THE REGISTER OF ENTITIES

The Register of entities aims to determine and identify the entities subject to the reliability standards in accordance with the functions of the NERC's Reliability Functional Model they assume, in order to establish the reliability standards to which they are subject.

In addition, in order to properly define the applicability of standards in Québec, the Register lists the following items related to each entity:

- Facilities of the Main Transmission System;
- Facilities of the Bulk Power System[1];
- Critical Assets ;
- Transmission lines operated at 200 kV or above;
- Facilities and equipments required for system restoration;
- Special Protection Systems classified type I or II by the NPCC.

The Register also contains information about the specifics of entities or systems that they own, such as underfrequency or an undervoltage load shedding system.

2. ENTITIES

2.1 Factors of inclusion

Entities considered for inclusion to the register are the ones that may be subject to enforcement under the reliability standards pursuant to section 85.3 of the Act respecting the Régie de l'énergie ("The Act"):

1° an owner or operator of a facility with a capacity of 44 kV or more connected to an electric power transmission system;

2° an owner or operator of an electric power transmission system;

3° an owner or operator of a production facility with a capacity of 50 megavolt amperes (MVA) or more connected to an electric power transmission system;

4° a distributor with a peak capacity of over 25 megawatts (MW), whose facilities are connected to an electric power transmission system; and

5° a person who uses an electric power transmission system under an electric power transmission service agreement with the electric power carrier or with any other carrier in Québec.

Electric Power Transmission System

The reliability coordinator designates the Main Transmission System (MTS) under his supervision as the electric power transmission system to which the Act refers in paragraphs 1° and 2° of section 85.3. This allows for the exclusion of the industrial customers and the owners or operators of power plants with less than 50 MVA, usually connected at 49 kV, 69 kV or 120 kV, which have no impact on the reliability of the Main Transmission System.

[1] Elements of the Bulk Power System are determined using NPCC's A-10 criteria revised on December 1st, 2009.

Production facilities

Production facilities with a capacity of 50 MVA or more (identified in paragraph 3° of section 85.3) are part of the Main Transmission System (MTS) under the supervision of the Reliability Coordinator. The owners and operators of these facilities are subject to enforcement under the reliability standards, regardless of the nature of the system they are connected to, since these entities have an impact on the reliability in terms of maintaining supply/demand balance in Québec Interconnection.

Distributors

For the purposes of maintaining supply/demand balance, the distributors identified in paragraph 4° of section 85.3 are also included in the Register of entities subject to reliability standards regardless of the system they are connected to, whether it's the main transmission system or a regional system.

2.2 Identification of Entities Subject to Reliability Standards

The following table lists the entities subject to reliability standards and their functions in accordance with NERC Reliability Functional Model. Detailed information for each entity are presented at Appendix A.

#[1]	ENTITY (in alphabetical order)	ACRONYM	RC	BA	TOP	TO	TP	TSP	PA	GO	GOP	RP	LSE	DP
001	Arcelor Mittal Montréal (Usine De Longueuil)	AMM				TO								
002	Canadian Hydro Developers Inc. (Kenwind Industries Ltd)	CHD								GO	GOP			
003	Cartier Énergie Éolienne (AAV) Inc.	AAV								GO	GOP			
004	Cartier Énergie Éolienne (BDS) Inc.	BDS								GO	GOP			
005	Cartier Énergie Éolienne (CAR) Inc.	CAR								GO	GOP			
006	Cartier Énergie Éolienne (GM) Inc.	GM								GO	GOP			
007	Cartier Énergie Éolienne (MS) Inc.	MS								GO	GOP			
008	Direction - Contrôle des mouvements d'énergie, une direction d'HQT	CMÉ	RC	BA	TOP									
009	Domtar Inc. (Lebel-sur-Quévillon)	DOM								GO	GOP			
010	Énergie éolienne Le Plateau s.e.c (Invenergy)	ÉLP				TO				GO	GOP			
011	Énergie La Lièvre s.e.c.	ÉLL				TO				GO	GOP			DP
012	Hydro-Québec Distribution	HQD										RP	LSE	DP
013	Hydro-Québec Production	HQP								GO	GOP			
014	Hydro-Québec TransÉnergie	HQT				TO	TP	TSP	PA					DP
015	Hydro-Saguenay (Produits forestiers Résolu)	HS								GO	GOP			
016	Kruger Inc. (Trois-Rivières)	KRU				TO								
017	La Société en Commandite Hydroélectrique Manicouagan	SCHM				TO				GO	GOP			DP
018	NextEra Energy Resources (FPL Group)	NER								GO	GOP			

[1] The number corresponds to the page of Appendix A where the detailed information about the entity is.

#[1]	ENTITY (in alphabetical order)	ACRONYM	RC	BA	TOP	TO	TP	TSP	PA	GO	GOP	RP	LSE	DP
019	Northland Power Inc.	NLP								GO	GOP			
020	PPG Canada Inc.	PPG				TO								
021	Rio Tinto Alcan	RTA				TO				GO	GOP			DP
022	Rolls-Royce Canada Limitée	RRC								GO	GOP			
023	Société de transmission électrique de Cedars Rapids Limitée	CRT				TO		TSP						
024	Société en commandite Produits Chimiques Canexus Canada	PCC				TO								
025	TransCanada Québec Inc. (Centrale Cogénération Bécancour)	TCQ								GO	GOP			
026	Ville de Baie-Comeau	BAI												DP
027	Ville de Joliette (Hydro-Joliette)	JOL												DP
028	Ville de Magog (Hydro-Magog)	MAG												DP
029	Ville de Saguenay (Hydro-Jonquière)	JON												DP
030	Ville de Sherbrooke (Hydro-Sherbrooke)	SHER												DP

3. APPENDICES LIST

- **APPENDIX A : Entity Information**
- **APPENDIX B : Transmission Facilities**
- **APPENDIX C : Generation Facilities**
- **APPENDIX D : Telecommunications Facilities**
- **APPENDIX E : Special Protection Systems**
- **APPENDIX F : Control Centers**
- **APPENDIX G : List of facilities in respect of which the Régie suspend the application of reliability standards in its decision D-2015-213**

4. VERSION HISTORY

Version	Modifications	Decision
June 23, 2015	Initial version	D-2015-098
December , 4, 2015	Elimination of PSE et IA functions	D-2015-195
December 21, 2015	Modification of the characteristics of the groups and installed capacity for Grand-Mère generating facility Addition of the appendix G listing the facilities for which the application of reliability standards is suspended	D-2015-213

APPENDIX A – ENTITY INFORMATION

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Arcelor Mittal Montréal (Usine de Longueuil)**	Acronym	**AMM**

Corporate Address

Street	2555 Chemin du lac
City	Longueuil
Province / State	Québec
Postal / ZIP code	J4N 1C1
Country	Canada

Website: http://www.arcelormittal.com

Factors of Inclusion to the Register	
☑	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☐	Owner or operator of a production facility with a capacity of 50 MVA or above
☐	Distributor with a peak capacity of 25 MW or above
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	BA ☐	TOP ☐	TO ☑	GO ☐	GOP ☐	
	PA ☐	TP ☐	TSP ☐	RP ☐	DP ☐	LSE ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☐ 161	☐ 230	☐ 315	☑ 450	☐ 735	☐
Installed Generation Capacity 0 MVA	Industrial Customer ☑			Generation Facility for Industrial Use ☐				

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

- Facility connected on line 3061 (tap-off).
- 315 kV equipment including transformers T1 and T2.

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Canadian Hydro Developers Inc.**	Acronym	**CHD**
	(Kenwind Industries Ltd.)		

Corporate Address

Street	149 rue Savard C.P. 485
City	Matane
Province / State	Québec
Postal / ZIP code	G4W 3P5
Country	Canada

Website: http://www.transalta.com

Factors of Inclusion to the Register	
☐	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☑	Owner or operator of a production facility with a capacity of 50 MVA or above
☐	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☐	**GO** ☑	**GOP** ☑	
	PA ☐	**TP** ☐	**TSP** ☐	**RP** ☐	**DP** ☐	**LSE** ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☐ 161	☐ 230	☑ 315	☐ 450	☐ 735	☐
Installed Generation Capacity 64 MVA	Industrial Customer ☐		Generation Facility for Industrial Use ☐					

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

Wind farm of 50 MVA or above :
- Le Nordais (2) Cap-Chat.

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Cartier Énergie Éolienne (AAV) Inc.**	Acronym	**AAV**

Corporate Address

Street	1201 boul. Anse-à-Valleau
City	Gaspé
Province / State	Québec
Postal / ZIP code	G4X 4A1
Country	Canada

Factors of Inclusion to the Register	
☐	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☑	Owner or operator of a production facility with a capacity of 50 MVA or above
☐	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☐	**GO** ☑	**GOP** ☑	
	PA ☐	**TP** ☐	**TSP** ☐	**RP** ☐	**DP** ☐	**LSE** ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☐ 161	☑ 230	☐ 315	☐ 450	☐ 735	☐
Installed Generation Capacity 115 MVA	Industrial Customer ☐		Generation Facility for Industrial Use ☐					

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks
Wind farm of 50 MVA or above: - Anse-à-Valleau

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Cartier Énergie Éolienne (BDS) Inc.**	Acronym	**BDS**

Corporate Address

Street	9 Route du cimetière
City	Baie-des-Sables
Province / State	Québec

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☐ 120	☑ 161	☑ 230	☑ 315	☑ 450	☑ 735	☑
Installed Generation Capacity MVA		Industrial Customer ☐			Generation Facility for Industrial Use ☐			

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	YES
Assets classified as critical for CIP Standards	YES
Transmission lines operated at 200 kV or above	YES
Facility / Equipement required for system restoration	YES
Special Protection System classified as Type I or Type II by NPCC	YES
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / YES

Remarks

– Reliability Coordinator
– Balancing Authority
– Transmission Operator
– Interchange Authority
– Centre de conduite du réseau (CCR)
– Centre de conduite du réseau de relève (RCCR)

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Domtar Inc. (Usine de Lebel-sur-Quevillon)**	Acronym	**DOM**

Corporate Address

Street	30, chemin du Moulin
City	Lebel-sur-Quévillon
Province / State	Québec
Postal / ZIP code	J0Y 1X0
Country	Canada

Website: http://www.domtar.com/

Factors of Inclusion to the Register	
☐	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☑	Owner or operator of a production facility with a capacity of 50 MVA or above
☐	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☐	**GO** ☑	**GOP** ☑	
	PA ☐	**TP** ☐	**TSP** ☐	**RP** ☐	**DP** ☐	**LSE** ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☑ 161	☐ 230	☐ 315	☐ 450	☐ 735	☐
Installed Generation Capacity 55 MVA	Industrial Customer ☐		Generation Facility for Industrial Use ☑					

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

– Cogeneration of over 50 MVA almost exclusively used to supply its own industrial loads.
Note : Suspended operations (Reliability Standards will apply when the operations resume. If applicable, reliability standards will also apply to the entity that will acquire the facilities subject to the standards and resume the operations.)

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Énergie éolienne Le Plateau s.e.c**	Acronym	**ÉLP**

Corporate Address

Street	42 Rang de l'Église Nord
City	L'Ascension-de-Patapédia
Province / State	Québec
Postal / ZIP code	G0J 1R0
Country	Canada

Website: http://www.invenergyllc.com/

Factors of Inclusion to the Register	
☑	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☑	Owner or operator of a production facility with a capacity of 50 MVA or above
☐	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☑	**GO** ☑	**GOP** ☑	
	PA ☐	**TP** ☐	**TSP** ☐	**RP** ☐	**DP** ☐	**LSE** ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☐ 161	☐ 230	☐ 315	☑ 450	☐ 735	☐
Installed Generation Capacity 138 MW	Industrial Customer ☐		Generation Facility for Industrial Use ☐					

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

- Wind farm of 50 MVA or above:
  - Le Plateau
- Connected to the MTS on line 3089 (tap-off) (Matapédia - Rimouski).

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Énergie La Lièvre s.e.c.**	Acronym	**ÉLL**

Corporate Address

Street	2 Chemin Montréal Ouest
City	Gatineau
Province / State	Québec
Postal / ZIP code	J8M 2E1
Country	Canada

Website: http://www.brookfieldpower.com

Factors of Inclusion to the Register	
☑	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☑	Owner or operator of a production facility with a capacity of 50 MVA or above
☐	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☑	**GO** ☑	**GOP** ☑	
	PA ☐	**TP** ☐	**TSP** ☐	**RP** ☐	**DP** ☑	**LSE** ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☑ 161	☐ 230	☑ 315	☐ 450	☐ 735	☐
Installed Generation Capacity 236 MVA	Industrial Customer ☐			Generation Facility for Industrial Use ☐				

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	YES
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

– Transmission system interconnected to HQT's system in Québec and Hydro-One's system in Ontario.
– Generation facilities of 50 MVA or above: Masson and High-Falls.

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Hydro-Québec Distribution**	Acronym	**HQD**

Factors of Inclusion to the Register	
☐	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☐	Owner or operator of a production facility with a capacity of 50 MVA or above
☑	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☐	**GO** ☐	**GOP** ☐	
	PA ☐	**TP** ☐	**TSP** ☐	**RP** ☑	**DP** ☑	**LSE** ☑	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☐ 161	☐ 230	☐ 315	☐ 450	☐ 735	☐
Installed Generation Capacity MVA		Industrial Customer ☐			Generation Facility for Industrial Use ☐			

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	NO
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks
– Distribution systems supplying the majority of the customers in Québec. – Resource Planner.

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Hydro-Québec Production**	Acronym	**HQP**

Corporate Address

Street	75 René-Lévesque Ouest, 10ième étage
City	Montréal
Province / State	Québec
Postal / ZIP code	H2Z 1A4
Country	Canada

Website: http://www.hydroquebec.com

Factors of Inclusion to the Register	
☑	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☑	Owner or operator of a production facility with a capacity of 50 MVA or above
☐	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☐	**GO** ☑	**GOP** ☑	
	PA ☐	**TP** ☐	**TSP** ☐	**RP** ☐	**DP** ☐	**LSE** ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☐ 161	☐ 230	☐ 315	☐ 450	☐ 735	☐
Installed Generation Capacity 36018 MVA	Industrial Customer ☐		Generation Facility for Industrial Use ☐					

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	YES
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	YES
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

– 50 generation facilities (hydro, thermal, gas) of 50 MVA or above.
Note: 3 hydroelectric power plants under construction.

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Hydro-Québec TransÉnergie**	Acronym	**HQT**

Corporate Address

Street	Complexe Desjardins C.P. 10000 succ. Pl. Desjardins, 9ième étage
City	Montréal
Province / State	Québec
Postal / ZIP code	H5B 1H7
Country	Canada

Factors of Inclusion to the Register	
☑	Owner or operator of a facility connected to the MTS
☑	Owner or operator of the MTS
☐	Owner or operator of a production facility with a capacity of 50 MVA or above
☐	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☑	**GO** ☐	**GOP** ☐	
	PA ☑	**TP** ☑	**TSP** ☑	**RP** ☐	**DP** ☑	**LSE** ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☑ 161	☑ 230	☑ 315	☑ 450	☑ 735	☑
Installed Generation Capacity MVA		Industrial Customer ☐			Generation Facility for Industrial Use ☐			

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	YES
Assets classified as critical for CIP Standards	YES
Transmission lines operated at 200 kV or above	YES
Facility / Equipement required for system restoration	YES
Special Protection System classified as Type I or Type II by NPCC	YES
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	YES / YES

Remarks

– Main Transmission System.
– Bulk Power System.
– Regional Systems operated at 200 kV or above.
– 15 delivery/reception nodes.
– Telecommunication network.
– Special Protection System.
– Planning Coordinator.
– 3 regional control center operated from 7 business places.

☐	Owner or operator of the MTS
☐	Owner or operator of a production facility with a capacity of 50 MVA or above
☑	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☐	**GO** ☐	**GOP** ☐	
	PA ☐	**TP** ☐	**TSP** ☐	**RP** ☐	**DP** ☑	**LSE** ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☑ 161	☐ 230	☐ 315	☐ 450	☐ 735	☐
Installed Generation Capacity MVA		Industrial Customer ☐			Generation Facility for Industrial Use ☐			

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	NO
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

- Distribution system supplied by Hydro-Magog substation connected on lines 1386 (Sherbrooke / Magog) and 1387 (Sherbrooke) (Tap-off).
- Does not manage controllable or interruptible loads.
- Delegates the supply of electricity to HQD.

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Ville de Saguenay service Hydro-Jonquière**	Acronym	**JON**

Corporate Address

Street	1710 rue Sainte-Famille C.P. 2000
City	Jonquière
Province / State	Québec
Postal / ZIP code	G7X 7W7
Country	Canada

Website: http://www.ville.saguenay.qc.ca

Factors of Inclusion to the Register	
☐	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☐	Owner or operator of a production facility with a capacity of 50 MVA or above
☑	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☐	**GO** ☐	**GOP** ☐	
	PA ☐	**TP** ☐	**TSP** ☐	**RP** ☐	**DP** ☑	**LSE** ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☐ 161	☑ 230	☐ 315	☐ 450	☐ 735	☐
Installed Generation Capacity MVA		Industrial Customer ☐		Generation Facility for Industrial Use ☐				

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	NO
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

- Distribution sytem supplied by:
  - Jean-Dechêne substation connected on lines 1642 and 1643 (tap-off) (Saguenay / Simard).
  - 25 kV line feeders of Jonquière substation (HQT).
- Does not manage controllable or interruptible loads.
- Delegates the supply of electricity to HQD.

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Ville de Sherbrooke (Service d'Hydro-Sherbrooke)**	Acronym	**SHER**

Corporate Address

Street	1800, rue Roy, C.P. 610
City	Sherbrooke
Province / State	Québec
Postal / ZIP code	J1H 5H9
Country	Canada

Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

- Distribution system supplied by:
  - Galt substation connected on lines 1189 and 1191
  - Orford substation connected on line 1189 and 1175
  - St-François substation connected on lines 1189 and 1191
- Does not manage controllable or interruptible loads.
- Delegates the supply of electricity to HQD.
