PIÈCE DÉPOSÉE EN VERSION ÉLAGUÉE

REGISTRE DES ENTITÉS VISÉES PAR LES NORMES DE FIABILITÉ (VERSION ANGLAISE)

Register of Entities Subject to Reliability Standards

July 2016

REDACTED VERSION

TABLE OF CONTENTS

1. OBJECT OF THE REGISTER OF ENTITIES

The Register of entities aims to determine and identify the entities subject to the reliability standards in accordance with the functions of the NERC's Reliability Functional Model they assume, in order to establish the reliability standards to which they are subject.

In addition, in order to properly define the applicability of standards in Québec, the Register lists the following items related to each entity:

- Facilities of the Main Transmission System;
- Facilities of the Bulk Power System[1];
- Critical Assets ;
- Transmission lines operated at 200 kV or above;
- Facilities and equipments required for system restoration;
- Special Protection Systems classified type I or II by the NPCC.

The Register also contains information about the specifics of entities or systems that they own, such as underfrequency or an undervoltage load shedding system.

2. ENTITIES

2.1 Factors of inclusion

Entities considered for inclusion to the register are the ones that may be subject to enforcement under the reliability standards pursuant to section 85.3 of the Act respecting the Régie de l'énergie ("The Act"):

1° an owner or operator of a facility with a capacity of 44 kV or more connected to an electric power transmission system;

2° an owner or operator of an electric power transmission system;

3° an owner or operator of a production facility with a capacity of 50 megavolt amperes (MVA) or more connected to an electric power transmission system;

4° a distributor with a peak capacity of over 25 megawatts (MW), whose facilities are connected to an electric power transmission system; and

5° a person who uses an electric power transmission system under an electric power transmission service agreement with the electric power carrier or with any other carrier in Québec.

Electric Power Transmission System

The reliability coordinator designates the Main Transmission System (MTS) under his supervision as the electric power transmission system to which the Act refers in paragraphs 1° and 2° of section 85.3. This allows for the exclusion of the industrial customers and the owners or operators of power plants with less than 50 MVA, usually connected at 49 kV, 69 kV or 120 kV, which have no impact on the reliability of the Main Transmission System.

[1] Elements of the Bulk Power System are determined using NPCC's A-10 criteria revised on December 1st, 2009.

Production facilities

Production facilities with a capacity of 50 MVA or more (identified in paragraph 3° of section 85.3) are part of the Main Transmission System (MTS) under the supervision of the Reliability Coordinator. The owners and operators of these facilities are subject to enforcement under the reliability standards, regardless of the nature of the system they are connected to, since these entities have an impact on the reliability in terms of maintaining supply/demand balance in Québec Interconnection.

Distributors

For the purposes of maintaining supply/demand balance, the distributors identified in paragraph 4° of section 85.3 are also included in the Register of entities subject to reliability standards regardless of the system they are connected to, whether it's the main transmission system or a regional system.

2.2 Identification of Entities Subject to Reliability Standards

The following table lists the entities subject to reliability standards and their functions in accordance with NERC Reliability Functional Model. Detailed information for each entity are presented at Appendix A.

#[1]	ENTITY	ACRONYM	RC	BA	TOP	TO	TP	TSP	PA	GO	GOP	RP	LSE	DP
001	Arcelor Mittal Montréal (Usine De Longueuil)	AMM				TO								
002	Axiall Canada Inc.	AXI				TO								
003	Canadian Hydro Developers Inc. (Kenwind Industries Ltd)	CHD								GO	GOP			
004	Canexus Corporation (S.E.C. Produits chimiques Canexus)	CAN				TO								
005	Cartier Énergie Éolienne (AAV) Inc.	AAV								GO	GOP			
006	Cartier Énergie Éolienne (BDS) Inc.	BDS								GO	GOP			
007	Cartier Énergie Éolienne (CAR) Inc.	CAR								GO	GOP			
008	Cartier Énergie Éolienne (GM) Inc.	GM								GO	GOP			
009	Cartier Énergie Éolienne (MS) Inc.	MS								GO	GOP			
010	Des Moulins Wind (Énergie éolienne Des Moulins S.E.C.)	MOU								GO	GOP			
011	EEN CA Lac Alfred S.E.C. et Enbridge Lac Alfred Wind Project S.E.C.(EDF EN Canada Inc.)	LA								GO	GOP			
012	EEN CA Massif-Du-Sud S.E.C. et Enbridge Massif-Du-Sud Wind Project S.E.C. (EDF EN Canada Inc.)	MDS								GO	GOP			
013	EEN CA Mont-Rothery S.E.C. (EDF EN Canada Inc.)	ROT								GO	GOP			
014	EEN CA Rivière-du-Moulin S.E.C. et Éolien DIM S.E.C. (EDF EN Canada Inc.)	RDM								GO	GOP			
015	EEN CA Hermine Saint-Robert-Bellarmin S.E.C. et Enbridge Saint-Robert-Bellarmin Wind Project S.E.C. (EDF EN Canada Inc.)	SRB								GO	GOP			
016	Énergie éolienne Le Plateau I S.E.C. (Le Plateau I Wind)	ÉLP				TO				GO	GOP			
017	Énergie éolienne Vents du Kempt S.E.C.	VDK								GO	GOP			
018	Énergie Renouvelable Brookfield (Énergie La Lièvre s.e.c.)	ÉLL				TO				GO	GOP			DP
019	Éoliennes de l'Érable S.E.C.	EER								GO	GOP			
020	Fortress Cellulose Spécialisée	FOR								GO	GOP			

[1] The number corresponds to the page of Appendix A where the detailed information about the entity is.

#[1]	ENTITY	ACRONYM	RC	BA	TOP	TO	TP	TSP	PA	GO	GOP	RP	LSE	DP
021	Hydro-Magog	MAG												DP
022	Hydro-Québec - Contrôle des mouvements d'énergie (une direction de HQT)	HQCMÉ	RC	BA	TOP

040	Ville de Sherbrooke (Hydro-Sherbrooke)	SHER												DP

3. APPENDICES LIST

- **APPENDIX A : Entity Information**
- **APPENDIX B : Transmission Facilities**
- **APPENDIX C : Generation Facilities**
- **APPENDIX D : Telecommunications Facilities**
- **APPENDIX E : Special Protection Systems**
- **APPENDIX F : Control Centers**
- **APPENDIX G : List of facilities in respect of which the régie suspend the application of reliability standards in its decisions D-2015-213 and D-2016-109**

4. VERSION HISTORY

Version	Changes	Decision
June 23, 2015	Original version	D-2015-098
December 4, 2015	Deleted PSE and IA functions	D-2015-195
December 21, 2015	Modified Grand-Mère generating facility installed power and generating unit specifications Added Appendix G – List of facilities in respect of which the Régie suspends the application of Reliability Standards	D-2015-213
July 15, 2016	Modifications following the appendix of the decision D-2016-109 Addition of the facility "Siemens Canada Limitée" to the appendix G	D-2016-109

APPENDIX A – ENTITY INFORMATION

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Arcelor Mittal Montréal (Usine de Longueuil)**	Acronym	**AMM**

Corporate Address

Street	2555 Chemin du lac
City	Longueuil
Province / State	Québec
Postal / ZIP code	J4N 1C1
Country	Canada

Website: http://www.arcelormittal.com

Factors of Inclusion to the Register	
☑	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☐	Owner or operator of a production facility with a capacity of 50 MVA or above
☐	Distributor with a peak capacity of 25 MW or above
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☑	**GO** ☐	**GOP** ☐	
	PA ☐	**TP** ☐	**TSP** ☐	**RP** ☐	**DP** ☐	**LSE** ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☐ 161	☐ 230	☐ 315	☑ 450	☐ 735	☐
Installed Generation Capacity 0 MVA	Industrial Customer ☑			Generation Facility for Industrial Use ☐				

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

- Facility connected on line 3061 (tap-off).
- 315 kV equipment including transformers T1 and T2.

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Axiall Canada Inc.**	Acronym	**AXI**

Corporate Address

Street	31 de l'industrie
City	Beauharnois
Province / State	Québec
Postal / ZIP code	J6N 1W5
Country	Canada

Website http://www.ppg.com

Factors of Inclusion to the Register	
☑	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☐	Owner or operator of a production facility with a capacity of 50 MVA or above
☐	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	BA ☐	TOP ☐	TO ☑	GO ☐	GOP ☐	
	PA ☐	TP ☐	TSP ☐	RP ☐	DP ☐	LSE ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☑ 161	☐ 230	☐ 315	☐ 450	☐ 735	☐
Installed Generation Capacity MVA		Industrial Customer ☑			Generation Facility for Industrial Use ☐			

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

– Connected to DeLéry and Beauharnois-Est substations (L1437).
– Backup supply on line 1436.
– 120 kV equipment including transformers T1 and T2.

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Canadian Hydro Developers Inc.**	Acronym	**CHD**
	(Kenwind Industries Ltd.)		

Corporate Address

Street	149 rue Savard C.P. 485
City	Matane
Province / State	Québec
Postal / ZIP code	G4W 3P5
Country	Canada

Factors of Inclusion to the Register	
☐	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☑	Owner or operator of a production facility with a capacity of 50 MVA or above
☐	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☐	**GO** ☑	**GOP** ☑	
	PA ☐	**TP** ☐	**TSP** ☐	**RP** ☐	**DP** ☐	**LSE** ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☐ 161	☐ 230	☑ 315	☐ 450	☐ 735	☐
Installed Generation Capacity 64 MVA	Industrial Customer ☐		Generation Facility for Industrial Use ☐					

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

Wind farm of 50 MVA or above :
- Le Nordais (2) Cap-Chat.

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**Canexus Corporation**	Acronym	**CAN**
	S.E.C. Produits chimiques Canexus		

Corporate Address

Street	75 Chemin des hauts fourneaux
City	Beauharnois (usine)
Province / State	Québec
Postal / ZIP code	J6N 3C1
Country	Canada

Factors of Inclusion to the Register	
☑	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☐	Owner or operator of a production facility with a capacity of 50 MVA or above
☐	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☑	**GO** ☐	**GOP** ☐	
	PA ☐	**TP** ☐	**TSP** ☐	**RP** ☐	**DP** ☐	**LSE** ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☑ 161	☐ 230	☐ 315	☐ 450	☐ 735	☐
Installed Generation Capacity MVA		Industrial Customer ☑			Generation Facility for Industrial Use ☐			

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

– Connected to PPG Canada's substation (Bus B1 connected to MTS via L1437).
– Backup supply on line 1436.
– 120 kV equipment including transformer T3.

Factors of Inclusion to the Register

☐	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☑	Owner or operator of a production facility with a capacity of 50 MVA or above
☐	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model

RC	BA	TOP	TO	GO	GOP	
☐	☐	☐	☐	☑	☑	
PA	**TP**	**TSP**	**RP**	**DP**	**LSE**	
☐	☐	☐	☐	☐	☐	

General Characteristics of the Facilities

Voltage Levels (kV): <120 ☐ | 120 ☑ | 161 ☐ | 230 ☐ | 315 ☐ | 450 ☑ | 735 ☐ | ☐

Installed Generation Capacity	Industrial Customer	Generation Facility for Industrial Use
324,6 MW	☐	☐

The entity owns and/or operates:

Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

Wind farm of 50 MVA or above:
- Lac Alfred et La Mitis 324,6 MW (combined)

The operation of the wind farm has been delegated to EDF Énergie Renouvelable Services Inc., an affiliated company.La Mitis (24,6 MW) wind farm has a different ownership structure.

Factors of Inclusion to the Register	
☐	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☑	Owner or operator of a production facility with a capacity of 50 MVA or above
☐	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☐	**GO** ☑	**GOP** ☑	
	PA ☐	**TP** ☐	**TSP** ☐	**RP** ☐	**DP** ☐	**LSE** ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☑ 161	☐ 230	☐ 315	☐ 450	☐ 735	☐
Installed Generation Capacity 150 MW	Industrial Customer ☐		Generation Facility for Industrial Use ☐					

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

Wind farm of 50 MVA or above:
- Massif-du-Sud 150 MW

The operation of the wind farm has been delegated to EDF Énergie Renouvelable Services Inc., an affiliated company.

☐	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☑	**GO** ☐	**GOP** ☐	
	PA ☐	**TP** ☐	**TSP** ☐	**RP** ☐	**DP** ☐	**LSE** ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☑ 161	☐ 230	☑ 315	☐ 450	☐ 735	☐
Installed Generation Capacity MVA		Industrial Customer ☑			Generation Facility for Industrial Use ☐			

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

– Connected to Trois-Rivières substation on line 2389.
– Backup supply on line 2385.
– 230 kV equipment including transformers T1, T2 and T3.

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification			
Corporate Identification	**NextEra Energy Resources Inc.**	Acronym	**NER**

Corporate Address

Street	700 Universe Boulevard
City	Juno Beach
Province / State	Florida
Postal / ZIP code	33408
Country	United States

Website: http://www.nexteraenergyresources.com

Factors of Inclusion to the Register	
☐	Owner or operator of a facility connected to the MTS
☐	Owner or operator of the MTS
☑	Owner or operator of a production facility with a capacity of 50 MVA or above
☐	Distributor with a peak capacity of over 25 MW
☐	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model							
	RC ☐	**BA** ☐	**TOP** ☐	**TO** ☐	**GO** ☑	**GOP** ☑	
	PA ☐	**TP** ☐	**TSP** ☐	**RP** ☐	**DP** ☐	**LSE** ☐	

General Characteristics of the Facilities								
Voltage Levels (kV)	<120	☑ 120	☐ 161	☑ 230	☐ 315	☐ 450	☐ 735	☐
Installed Generation Capacity 114 MVA	Industrial Customer ☐		Generation Facility for Industrial Use ☐					

The entity owns and/or operates:	
Transmission or generation facility classified as MTS	YES
Transmission or generation facility classified as Bulk Power System	NO
Assets classified as critical for CIP Standards	NO
Transmission lines operated at 200 kV or above	NO
Facility / Equipement required for system restoration	NO
Special Protection System classified as Type I or Type II by NPCC	NO
Undervoltage load shedding program (DST) (owns / operates)	NO / NO
Underfrequency load shedding program (DSF) (owns / operates)	NO / NO

Remarks

Wind farms of 50 MVA or above:
- Mont Copper
- Mont Miller
